CAUTION

SHORT CIRCUIT THE ANODE OF THE PICTURE TUBE AND THE ANODE CAP TO THE METAL CHASSIS, CRT SHIELD, OR THE CARBON PAINTED ON THE CRT, AFTER REMOVAL OF THE ANODE CAP.

WARNING !!

AN ISOLATION TRANSFORMER SHOULD BE USED DURING ANY SERVICE WORK TO AVOID POSSIBLE SHOCK HAZARD DUE TO LIVE CHASSIS, THE CHASSIS OF THIS RECEIVER IS DIRECTLY CONNECTED TO THE POWER LINE.

SAFETY-RELATED COMPONENT WARNING !!

COMPONENTS IDENTIFIED BY SHADING AND MARKED Δ ON THE SCHEMATIC DIAGRAMS, EXPLODED VIEWS AND IN THE PARTS LIST ARE CRITICAL FOR SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

ATTENTION

APRES AVOIR DECONNECTE LE CAP DE L'ANODE, COURT-CIRCUITER L'ANODE DU TUBE CATHODIQUE ET CELUI DE L'ANODE DU CAP AU CHASSIS METALLIQUE DE L'APPAREIL, OU AU COUCHE DE CARBONE PEINTE SUR LE TUBE CATHODIQUE OU AU BLINDAGE DU TUBE CATHODIQUE.

ATTENTION !!

AFIN D'EVITER TOUT RISQUE D'ELECTROCUTION PROVENANT D'UN CHÂSSIS SOUS TENTION, UN TRANSFORMATEUR D'ISOLEMENT DOIT ETRE UTILISÉ LORS DE TOUT DÉPANNAGE LE CHÂSSIS DE CE RÉCEPTEUR EST DIRECTMENT RACCORDÉ À L'ALIMENTATION SECTEUR.

ATTENTION AUX COMPOSANTS RELATIFS À LA SÉCURITÉ!!

LES COMPOSANTS IDENTIFIÉS PAR UNE TRAME ET PAR UNE MARQUE Δ SUR LES SCHÉMAS DE PRINCIPE, LES VUES EXPLOSÉES ET LES LISTES DE PIÈCES SONT D'UNE IMPORTANCE CRITIQUE POUR LA SÉCURITÉ DU FONCTIONNEMENT, NE LES REMPLACER QUE PAR DES COMPOSANTS SONY DONT LE NUMÉRO DE PIÈCE EST INDIQUÉ DANS LE PRÉSENT MANUEL OU DANS DES SUPPLÉMENTS PUBLIÉS PAR SONY.

CAUTION

Lead Free Soldered Boards

The circuit boards listed below [Table 1] used in these models may have been processed using Lead Free Solder. The boards are identified by the LF logo located close to the board designation e.g. F1, H1 etc [see examples]. The servicing of these boards requires special precautions to be taken as outlined below.

example 1

example 2

Table 1

Board	Function
A	Video & Audio Processors, Audio Output, Vertical Deflection
C	R,G,B Out
F1	Power Switch/Fuse/SIRCS/Standby LED
H6	Front AV Input/Headphone and Control Switches
VM	Velocity Modulation

It is strongly recommended to use Lead Free Solder material in order to guarantee optimal quality of new solder joints. Lead Free Solder is available under the following part numbers :

Partnumber	Diameter	Remarks
7-640-005-19	0.3mm	0.25Kg
7-640-005-20	0.4mm	0.50Kg
7-640-005-21	0.5mm	0.50Kg
7-640-005-22	0.6mm	0.25Kg
7-640-005-23	0.8mm	1.00Kg
7-640-005-24	1.0mm	1.00Kg
7-640-005-25	1.2mm	1.00Kg
7-640-005-26	1.6mm	1.00Kg

Due to the higher melting point of Lead Free Solder the soldering iron tip temperature needs to be set to 370 degrees centigrade. This requires soldering equipment capable of accurate temperature control coupled with a good heat recovery characteristics.

For more information on the use of Lead Free Solder, please refer to <http://www.sony-training.com>

AE-6B SELF DIAGNOSTIC SOFTWARE

The identification of errors within the AE-6B chassis is triggered in one of two ways :- 1: Busy or 2: Device failure to respond to IIC. In the event of one of these situations arising the software will first try to release the bus if busy (Failure to do so will report with a continuous flashing LED) and then communicate with each device in turn to establish if a device is faulty. If a device is found to be faulty the relevant device number will be displayed through the LED (Series of flashes which must be counted) See table 1, non fatal errors are reported using this method.

Each time the software detects an error it is stored within the NVM. See Table 2.

Table 1

Error Message	LED Code
No error	00
Reserved	01

PIP Error	16

How to enter into Table 2

1. Turn on the main power switch and enter into the stand-by mode.
2. Press the following sequence of buttons on the Remote Commander.

‘TT—’ will appear in the upper right corner of the screen. Other status information will also be displayed.

3. Press ‘MENU’ on the remote commander to obtain the Service menu on the screen.
4. Using the Remote Commander, Scroll to the ‘Error Menu’ item using the down arrow key, then press the right arrow key.
5. The following table will be displayed indicating the error count.

Table 2

ERROR MENU			
E02	OCP	(0, 255)	0

Flash Timing Example : e.g. error number 3

Note: To clear the error count data press ‘80’ on the Remote commander.

The operating instructions mentioned here are partial abstracts from the 'Operating Instruction Manual'. The page numbers of the 'Operating Instruction Manual' remain as in the manual.

Switching on the TV and Automatically Tuning

- 1** The first time you switch on your TV, a sequence of menu screens appear on the TV enabling you to:
- 1) choose the language of the menu screen, 2) choose the country in which you wish to operate the TV, 3) adjust the picture slant 4) search for and store all available channels (TV Broadcasts) and 5) change the order in which the channels (TV Broadcasts) appear on the screen.
- However, if you need to change any of these settings at a later date, you can do that by selecting the appropriate option in the **Menu** (Set Up menu) or by pressing the Auto Start Up Button **AS** on the TV set.

- 1** Connect the TV plug to the mains socket (220-240V AC, 50Hz). The first time that the TV set is connected, it is usually turned on. If the TV is off, press the **ON/OFF** button on the TV set to turn on the TV.
- The first time you switch on the TV, a **Language** menu appears automatically on the TV screen.

GB

- 2** Press the **Left** or **Right** button on the remote control to select the language, then press the **OK** button to confirm your selection. From now on all the menus will appear in the selected language.

- 3** The **Country** menu appears automatically on the TV screen. Press the **Left** or **Right** button to select the country in which you will operate the TV set, then press the **OK** button to confirm your selection.

- 4** If the country in which you want to use the TV set does not appear in the list, select **Other** instead of a country.
- In order to avoid wrong teletext characters for Cyrillic languages we recommend you select Russia as the country if your own country does not appear in the list.

- 4** Because of the earth's magnetism, the picture might slant. The **Picture Rotation** menu allows you to correct the picture slant if it is necessary.
- If it is not necessary, press the **Left** or **Right** button to select **Not necessary** and press **OK**.
 - If it is necessary, press the **Left** or **Right** button to select **Adjust now**, then press **OK** and correct any slant of the picture between -5 and +5 by pressing the **Left** or **Right** button. Finally press **OK** to store.

continued...

Switching on the TV and Automatically Tuning

- 5** The Auto Tuning menu appears on the screen. Press the **OK** button to select **Yes**.

- 6** The TV starts to automatically search and store all available broadcast channels for you.

- 1** This procedure could take some minutes. Please be patient and do not press any buttons, otherwise the automatic tuning will not be completed.

- 2** If no channels were found during the auto tuning process then a new menu appears automatically on the screen asking you to connect the aerial. Please connect the aerial (see page 6) and press **OK**. The auto tuning process starts again.

- 7** After all available channels are captured and stored, the **Programme Sorting** menu appears automatically on the screen enabling you to change the order in which the channels appear on the screen.

- a)** If you wish to keep the broadcast channels in their tuned order, go to step 8.

- b)** If you wish to store the channels in a different order:
- Press the **Left** or **Right** button to select the programme number that has the channel (TV Broadcast) you wish to rearrange, then press the **Left** button.
 - Press the **Left** or **Right** button to select the new programme number position for your selected channel (TV Broadcast), then press **OK**.
 - Repeat steps b)1 and b)2 if you wish to change the order of the other channels.

- 8** Press the **MENU** button to remove the menu from the screen.

Your TV is now ready for use.

Introducing and Using the Menu System

1 Your TV uses an on-screen menu system to guide you through the operations. Use the following buttons on the Remote Control to operate the menu system:

1 Press the **MENU** button to switch the first level menu on.

2

- To highlight the desired menu or option, press \blacktriangle or \blacktriangledown button.
- To enter to the selected menu or option, press \blacklozenge .
- To return to the last menu or option, press \blacktriangleleft .
- To alter the settings of your selected option, press $\blacktriangleleft/\blacktriangleright/\blacklozenge$ or \blacklozenge .
- To confirm and store your selection, press the **OK** button.

3 Press the **MENU** button to remove the menu from the screen.

GB

Menu Guide

Level 1

Level 2

Level 3 / Function

PICTURE ADJUSTMENT

The "Picture Adjustment" menu allows you to alter the picture adjustments.

To do this:

After selecting the item you want to alter press the \blacktriangle button, then repeatedly press the $\blacktriangleleft/\blacktriangleright$ or \blacklozenge buttons to make any adjustments and finally press the **OK** button to store.

This menu also allows you to customise the picture mode based on the programme you are watching:

- \blacktriangle **Personal** (for individual settings).
- \blacktriangle **Live** (for live broadcast programmes, DVD and Digital Set Top Box receivers).
- \blacktriangle **Movie** (for films).

- Brightness, Colour and Sharpness** can only be altered if "Personal" mode is selected.
- Hue** is only available for NTSC colour signal (e.g. USA video tapes).
- Select **Reset** and press the **OK** button to return the picture settings to their factory preset levels.

Level 2

Level 3 / Function

MANUAL PROGRAMME PRESET

The "Manual Programme Preset" option in the "Sat Up" menu allows you to:

- Preset channels or the VCR channel one by one to the programme order of your choice.

To do this:

- After selecting the "Manual Programme Preset" option, press the \blacktriangle button then with the \blacklozenge button highlighted press the \blacktriangle button. Press the \blacktriangle or \blacktriangledown buttons to select which programme number you want to preset the channel to (for VCR, select programme number "0"). Then press the \blacktriangle button.

- The availability of this option depends on the country you have selected in the "Language/Country" menu.

GB

After selecting the **System** option, press the \blacktriangle button. Then press the \blacktriangle or \blacktriangledown buttons to select the TV Broadcast system (B/G for western European countries or D/K for eastern European countries). Press the \blacktriangle button.

- After selecting the **Channel** option, press the \blacktriangle button. Then press the \blacktriangle or \blacktriangledown buttons to select the channel tuning ("C" for terrestrial channels or "S" for cable channels). Next press \blacktriangle button. After that press the numbered buttons to directly enter the channel number of the TV Broadcast or the VCR channel. If you do not know the channel number, press the \blacktriangle or \blacktriangledown buttons to search for it. When you have tuned to the desired channel, press the **OK** button twice to store.

Repeat all the above steps to tune and store more channels.

- Label a channel using up to five characters.

To do this:

After highlighting the **Programme** option, press the **PROG +/-** button to select the programme number of the channel you wish to name. When the programme you want to name appears on the screen, select the **Label** option and press \blacktriangle button. Next press the \blacktriangle or \blacktriangledown buttons to select a letter, number or "." for a blank. Press the \blacktriangle button to confirm the character. Select the other four characters in the same way. After selecting all the characters, press the **OK** button twice to store.

continued...

Introducing and Using the Menu System

Introducing and Using the Menu System

Level 1	Level 2	Level 3 / Function
		<p>AV3 OUTPUT</p> <p>The "AV3 Output" option in the "Detail Set Up" menu allows you to select the source to be output from the Scart connector (3-3/3-3) so you can record from this Scart any signal coming from the TV or from external equipment connected to Scart connectors 3-1/3-1 or 3-2/3-2 or the front connectors 3-4 or 3-4 and 3-4.</p> <p>If your VCR supports Smartlink, this procedure is not necessary.</p> <p>To do this: After selecting the option, press the \blacktriangleright button. Then press the \uparrow or \downarrow buttons to select the desired output signal: TV, AV1, AV2, AV4, YC4 or AUTO.</p>

If you select "AUTO", the output signal will always be the same one that is displayed on the screen.

If you have connected a decoder to the Scart socket (3-3/3-3) or to a VCR connected to that Scart socket, please remember to set the "AV3 Output" to "AUTO" or "TV" for correct unscrambling.

TV SPEAKERS

The "TV Speakers" option in the "Detail Set Up" menu allows you to mute the TV speakers in order to listen to the TV from an external amplifier connected to the audio outputs on the rear of the TV set.

To do this:
After selecting the option, press the \blacktriangleright button. Then press the \uparrow or \downarrow buttons to select **Off**. Finally press the OK button to confirm and store.

To cancel this function later on, select "On" instead of "Off" in the step above.

RGB CENTRING

When connecting an RGB source, such as a "PlayStation", you may need to readjust the horizontal position of the picture. In that case, you can readjust it using the "RGB Centring" option in the "Detail Set Up".

To do this:
While watching an RGB source select the "RGB Centring" option and press the \blacktriangleright button. Then press the \uparrow or \downarrow buttons to adjust the centre of the picture between -10 and +10. Finally press the OK button to confirm and store.

continued...

Level 1	Level 2	Level 3 / Function
		<p>c) Manually fine tune the TV to obtain a better picture reception if the picture is distorted. Normally the automatic fine tuning (AFT) is in operation, but you can alter it manually.</p> <p>To do this: Whilst watching the channel (TV Broadcast) you wish to fine tune, select the AFT option and press \blacktriangleright button. Next press the \uparrow or \downarrow buttons to adjust the fine tuning between -15 and +15. Finally press the OK button twice to store.</p> <p>d) Skip any unwanted programme numbers when they are selected with the PROG +/- buttons.</p> <p>To do this: After highlighting the Programme option, press the PROG +/- button to select the programme number you want to skip. When the programme number you want to skip appears on the screen, select the Skip option and press the \blacktriangleright button. Next press the \uparrow or \downarrow buttons to select Yes. Finally press the OK button twice to confirm and store.</p>

To cancel this function afterwards, select "No" instead of "Yes" in the step above.

e) View and record scrambled channels when using a decoder connected directly to the Scart socket (3-3/3-3) or through a VCR.

The availability of this option depends on the country you have selected in the "Language/Country" menu.

To do this:
Select the Decoder option and press the \blacktriangleright button. Next press the \uparrow or \downarrow buttons to select On. Finally press the OK button twice to confirm and store.

To cancel this function afterwards, select "Off" instead of "On" in the step above.

NOISE REDUCTION

The "Noise Reduction" option in the "Detail Set Up" menu allows you to automatically reduce any picture noise visible in the broadcast signal.

To do this:
After selecting the option, press the \blacktriangleright button. Then press the \uparrow or \downarrow buttons to select Auto. Finally press the OK button to confirm and store.

To cancel this function later on, select "Off" instead of "Auto" in the step above.

Level 1	Level 2	Level 3 / Function
		<p>f) View and record scrambled channels when using a decoder connected directly to the Scart socket (3-3/3-3) or through a VCR.</p> <p>The availability of this option depends on the country you have selected in the "Language/Country" menu.</p> <p>To do this: Select the Decoder option and press the \blacktriangleright button. Next press the \uparrow or \downarrow buttons to select On. Finally press the OK button twice to confirm and store.</p> <p>To cancel this function afterwards, select "Off" instead of "On" in the step above.</p>

Introducing and Using the Menu System

Level 1	Level 2	Level 3 / Function
		PICTURE ROTATION Because of the earth's magnetism, the picture might slant. If this is the case, you can correct the pictures slant by using the option "Picture Rotation" in the "Detail Set Up" menu. To do this: After selecting the option, press the \blacktriangle button. Then press the \blacktriangle or \blacktriangledown buttons to correct any slant of the picture between -5 and +5 and finally press the OK button to store.
		PIP INPUT The "PIP Input" option in the "Detail Set Up" menu allows you to select which picture source you want to watch in the "PIP" screen. To do this: After selecting the option, press the \blacktriangle button. Then repeatedly press the \blacktriangle or \blacktriangledown buttons to select the desired source (AV1, AV2, AV3, AV4 or TV). Finally press the OK button to store.
		PIP POSITION The "PIP Position" option in the "Detail Set Up" menu allows you to change the position of the "PIP" screen within the main screen. To do this: After selecting the option the \blacktriangle , \blacktriangleleft , \blacktriangleright or \blacktriangledown button to select the desired position. Finally press the OK button to store.

Teletext

- 1** Teletext is an information service transmitted by most TV stations. The index page of the teletext service (usually page 100) gives you information on how to use the service. To operate teletext, use the remote control buttons as indicated below.
- A** Teletext errors may occur if you use a channel (TV Broadcast) with a weak signal.
- To Switch on Teletext:**
 After selecting the TV channel which carries the teletext service you wish to view, press the \square button.
- To Select a Teletext page:**
 Input the 3 digits of the page number, using the numbered buttons.
 • If you have made a mistake, retype the correct page number.
 • If the counter on the screen continues searching, it is because the page is not available.
 In that case, input another page number.
- To access the next or preceding page:**
 Press PROG + \square or PROG - \square buttons.
- To superimpose teletext onto the TV:**
 Whilst you are viewing teletext, press the \square button. Press again to cancel teletext mode.
- To freeze a teletext page:**
 Press the \square button. Press again to cancel freeze.
- To reveal concealed information (e.g. answer to a quiz):**
 Press the \square button. Press again to conceal the information.
- To select a sub page:**
 A teletext page may consist of several sub pages. In this case the page number that appears on the upper left corner changes colour from yellow to green, and one or more arrows will appear next to the page number. Repeatedly press the \blacktriangle or \blacktriangledown buttons on the remote control to watch the desired sub page.
- To Switch Off Teletext:**
 Press \square button.
- Fastext**
1 The Fastext service lets you access pages with one button push.
1 While you are in Teletext mode and providing Fastext is broadcast, a colour coded menu appears at the bottom of the teletext page. Press one of the coloured buttons (red, green, yellow or blue) to access the corresponding page.

Connecting Additional Equipment

1 Using the following instructions you can connect a wide range of optional equipment to your TV set. (Connecting cables are not supplied).

* "PlayStation" is a product of Sony Computer Entertainment, Inc.
 * "PlayStation" is a trademark of Sony Computer Entertainment, Inc.

- To avoid picture distortion, do not connect external equipment to connectors **A** and **B** at the same time.
- Do not connect a Decoder to the Scart connector **F**.

Connecting a VCR:

To connect a VCR, please refer to the section "Connecting the aerial and VCR" of this instruction manual. We recommend you connect your VCR using a Scart lead. If you do not have a Scart lead, tune in the VCR test signal to the TV programme number "0" by using the "Manual Programme Preset" option. (for details of how to manually programme these presets, see page 13, step a). Refer to your VCR instruction manual to find out the output channel of your VCR.

Connecting a VCR that supports Smartlink:

Smartlink is a direct link between the TV set and the VCR. For more information on Smartlink, please refer to the instruction manual of your VCR. If you use a VCR that supports Smartlink, please connect the VCR by using a Scart lead to the Scart socket **C-3/3-3 G**.

If you have connected a decoder to the Scart C-3/3-3 G or through a VCR connected to this Scart:

Select the "Manual Programme Preset" option in the "Set Up" menu and after selecting the "Decoder***" option, select "On" (by using the \blacktriangle or \blacklozenge button). Repeat this procedure for each scrambled signal.

** The availability of this option depends on the country you have selected in the "Language/Country" menu.

continued...

Connecting Additional Equipment

Connecting to external Audio Equipment:

Plug in your Hi-Fi equipment to the audio output sockets **D** if you wish to amplify the audio output from your TV. Next, using the menu system, select the "Set Up" menu. Enter the "Detail Set Up" menu and set "TV Speakers" to "Off".

1 The audio level of the external speakers can be modified by pressing the volume buttons on the remote control. Also, treble and bass settings can be modified through the "Sound Adjustment" menu.

To enjoy "Dolby Virtual" sound effect through your Hi-Fi equipment:

Place the speakers of your equipment in front of your sitting position and besides the TV set, but keeping a distance of 50 cm from each speaker to the TV set. Then, using the menu system, select the menu "Sound Adjustment", and select "Dolby Virtual" on the "Effect" option.

Using optional Equipment

- 1 Connect your equipment to the designated TV socket, as indicated in the previous page.
- 2 Switch on the connected equipment.
- 3 To watch the picture from the connected equipment, press the \odot button repeatedly until the correct input symbol appears on the screen.

Symbol Input Signals

- | | |
|---------------|--|
| Symbol | Input Signals |
| \odot 1 | • Audio / video input signal through the Scart connector E . |
| \odot 1 | • RGB input signal through the Scart connector E . This symbol appears only if a RGB source has been connected. |
| \odot 2 | • Audio / video input signal through the Scart connector F . |
| \odot 2 | • RGB input signal through the Scart connector F . This symbol appears only if a RGB source has been connected. |
| \odot 3 | • Audio/video input signal through the Scart connector G . |
| \odot 3 | • S Video input signal through the Scart connector G . This symbol appears only if a S Video source has been connected. |
| \odot 4 | • Video input signal through the phono socket B and Audio input signal through phono socket C . |
| \odot 4 | • S Video input signal through the front S Video input jack A and Audio signal through phono socket C . This symbol appears only if a S Video source has been connected. |
- 4** Press \square button on the remote control to return to the normal TV picture.

For Mono Equipment

Connect the phono plug to the L/G/S/I socket on the front of the TV and select \odot 4 or \odot 4 input signal using the instructions above. Finally, refer to the "Sound Adjustment" section of this manual and select "Dual Sound" "A" on the sound menu screen.

Specifications

TV system	Depending on your country selection B/G/H, D/K
Colour System	PAL, SECAM NTSC 3.58, 4.43 (Video In only)
Channel Coverage	VHF: E2-E12 UHF: E21-E69 CATV: S1-S20 HYPER: S21-S41 D/K: R1-R12, R21-R69
Picture Tube	Flat display FD Trinitron 29" (approx. 73cm measured diagonally)
Rear Terminals	Ⓒ-1/Ⓒ-1 21-pin Scart connector (CENELEC standard) including audio/video input, RGB input, TV audio/video output Ⓒ-2/Ⓒ-2 21-pin Scart connector (CENELEC standard) including audio/video input, RGB input, monitor audio/video output Ⓒ-3/Ⓒ-3 21-pin Scart connector (CENELEC standard) including audio/video input, S-video input, selectable audio/video output and Smartlink interface Ⓒ-4 Audio outputs (Left/Right) - phono jacks
Front terminals	Ⓒ-4 S Video Input - 4 pin DIN Ⓒ-4 Video input - phono jack Ⓒ-4 Audio input - phono jacks Ⓒ-4 Headphones jack
Sound Output	2 x 20W (Music Power), 2 x 10W (RMS) Woofer: 30W (Music Power), 15W (RMS)
Power Consumption	130W
Standby Power Consumption	0.3W
Dimensions (WxHxD)	Approx. 771mm x 585mm x 506mm
Weight	Approx. 48.5kg
Accessories Supplied	1 Remote Control (RM-944), 2 batteries (IEC designated)
Other Features	<ul style="list-style-type: none"> • 100Hz picture • Teletext, Fastext, TOPtext (250 page TEXT memory) • Sleep Timer • Smartlink (direct link between your TV set and a compatible VCR. For more information on Smartlink, please refer to the Instruction Manual of your VCR) • TV system Autodetection • Dolby Virtual • BBE • PIP

Design and specifications are subject to change without notice.

♻️ 100% Recycled Paper - Totally Chlorine Free

Troubleshooting

 Here are some simple solutions to problems which may affect the picture and sound.

Problem	Suggested Remedy
No picture (screen is dark), and no sound.	<ul style="list-style-type: none"> • Check the aerial connection. • Plug the TV in and press the  button on the front of the TV. • If the standby indicator  is on press the  button or a numbered button on the remote control.
Poor or no picture (screen is dark), but good sound.	<ul style="list-style-type: none"> • Using the MENU system, select the "Picture Adjustment" display and select "RESET" to return to the factory settings.
No picture or menu information from equipment connected to the Scart socket.	<ul style="list-style-type: none"> • Check that the optional equipment is on, and press the  button of the remote control repeatedly until the correct input symbol is displayed on screen.
Good picture, no sound.	<ul style="list-style-type: none"> • Press the  button on the remote control. • Check that "TV Speakers" is "On" in the "Detail Set Up" menu. • Check the Headphones are not connected.
No colour on colour programmes.	<ul style="list-style-type: none"> • Using the MENU system, select the "Picture Adjustment" and select "RESET" to return to the factory settings.
Distorted picture when changing programmes or selecting Teletext.	<ul style="list-style-type: none"> • Turn off any equipment connected to the scart connectors on the rear of the TV.
Wrong characters appear when viewing teletext.	<ul style="list-style-type: none"> • Using the menu system, display the "Language/Country" menu and select the country in which you are operating the TV set. For cyrillic languages, we recommend selecting 'Russia' if your own country does not appear in the list.
Picture slanted.	<ul style="list-style-type: none"> • Using the menu system, select the "Picture Rotation" option in the "Detail Set Up" menu to correct the picture slant.
Snowy picture when viewing a TV channel.	<ul style="list-style-type: none"> • Using the menu system, select the "Manual Programme Preset" menu and adjust Fine Tuning (AFT) to obtain better picture reception. • Using the menu system, select the "Noise Reduction" option in the "Detail Set Up" menu and select "Auto" to reduce the noise in the picture.
No unscrambled picture whilst viewing an unscrambled channel with a decoder connected through the scart connector   .	<ul style="list-style-type: none"> • Using the menu system, display the "Set Up" menu. Then select the "Detail Set Up" option and set "AV3 Output" to "TV". • Check that the decoder is not connected to the   scart socket.
Remote control does not function.	<ul style="list-style-type: none"> • Replace the batteries.
The standby indicator  on the TV flashes.	<ul style="list-style-type: none"> • Contact your nearest Sony service centre.

- If you continue to have problems, have your TV serviced by qualified personnel.
- NEVER open the casing yourself.

SECTION 2 DISASSEMBLY

2-1. Rear Cover Removal

Remove the rear cover fixing screws indicated and pull the rear cover backwards away from the set.

2-2. Speaker Connector Disconnection

Before completely removing the rear cover disconnect the speaker connector which is located on the inside of the set.

2-3. Chassis Removal and Refitting

To remove lift the main bracket rear slightly and slide the chassis away from the beznet. Ensure that the interconnecting leads are released from their purse locks to prevent damage being caused.

When refitting the chassis ensure that the main bracket is located in the beznet guide slots before sliding the chassis forwards. Refit the inter-connecting leads in their respective purse locks.

2-4. Service Position

To place the chassis in the service position, remove the H bracket and stand the chassis as shown above. To gain access to the underside of the boards follow the instructions on page 16. [Removal and Replacement of the main bracket bottom plates].

2-5. G Board Removal

To remove the G Board release the clips circled and ease the board gently away from the support bracket. Removal of the D board follows the same procedure.

2-6. Service Connector for M Board

Extender Board Assembly A-1642-293-A

If the M Board needs to be removed for testing when the chassis is placed in its service position, it would be necessary to use an extender board and extension cable as indicated above. The Extender board and extension cable are available as a service part by ordering the part number as indicated.

2-7. Wire Dressing

Ensure that wires do not touch heatsinks and high temperature hotspots. All wires must be kept at a minimum distance of 20mm away from the EHT lead

2-8. Picture Tube Removal

WARNING: BEFORE REMOVING THE ANODE CAP

High voltage remains in the CRT even after the power is disconnected. To avoid electric shock, discharge CRT *before* attempting to remove the anode cap. Short between anode and CRT coated earth ground strap.

1. Discharge the anode of the CRT and remove the anode cap.
2. Unplug all interconnecting leads from the Deflection yoke, neck assy, degaussing coils and CRT grounding strap.
3. Remove the C Board from the CRT.
4. Remove the chassis assembly.
5. Loosen the Neck assembly fixing screw and remove.
6. Loosen the Deflection yoke fixing screw and remove.
7. Place the set with the CRT face down on a cushion and remove the Degaussing Coil holders.
8. Remove the Degaussing Coils.
9. Remove the CRT grounding strap and spring tensioners.
10. Unscrew the four CRT fixing screws [located on each CRT corner] and remove the CRT.
[Take care not to handle the CRT by the neck.]

Removal of the Anode-Cap

REMOVAL PROCEDURE.

- ① Turn up one side of the rubber cap in the direction indicated by the arrow (a)
- ② Using a thumb pull up the rubber cap firmly in the direction indicated by the arrow (b)
- ③ When one side of the rubber cap is separated from the anode button, the anode-cap can be removed by turning up the rubber cap and pulling it up in the direction of the arrow (c)

How to handle the Anode-Cap

1. To prevent damaging the surface of the anode-cap do not use sharp materials.
2. Do not apply too great a pressure on the rubber, as this may cause damage to the anode connector.
3. A metal fitting called a shatter hook terminal is fitted inside the rubber cap.
4. Do not turn the rubber foot over excessively, this may cause damage if the shatter hook sticks out.

REMOVAL AND REPLACEMENT OF THE MAIN-BRACKET BOTTOM PLATES.

(1) REMOVING THE PLATES

In the event of servicing being required to the solder side of the printed wiring boards, the bottom plates fitted to the main chassis bracket require to be removed. This is performed by cutting the gates with a sharp wire cutter at the locations indicated by the arrows.

Note : There are 2 plates fitted to the main bracket. Only remove the necessary plate to gain access to the printed wiring board.

For safety reasons, on no account should the plates be removed and not refitted after servicing.

(2) REFITTING THE PLATES

Because the plates differ in size it is important that the correct plates are refitted in their original location.

Please note that the plates need to be rotated 180 degrees from their cut position to allow the tabs to be fitted into their catch positions.

SECTION 3 SET-UP ADJUSTMENTS

- When complete readjustment is necessary or a new picture tube is installed, carry out the following adjustments.
- Unless there are specific instructions to the contrary, carry out these adjustments with the rated power supply.
- Unless there are specific instructions to the contrary, set the controls and switches to the following settings :

Contrast normal

Brightness normal

Carry out the adjustments in the following order :

- 3-1. Beam Landing.
- 3-2. Convergence.
- 3-3. Focus.
- 3-4. White Balance.

Note : Test equipment required.

1. Color bar/pattern generator.
2. Degausser.
3. Oscilloscope.
4. Digital multimeter.

3-1. Beam Landing

Preparation :

1. In order to reduce the influence of geomagnetism on the set's picture tube, face it in an easterly or westerly direction.
2. Switch on the TV set's power and degauss with a degausser.

(1) Adjustment of Correction Magnet for Y-Splitting Axis.

1. Input a crosshatch signal from the pattern generator.
2. Set the Picture control to minimum and confirm that the Brightness control is set to normal.
3. Position the neck assembly as indicated in Fig.3-2.
4. Loosen the deflection yoke fixing screw.
5. Move the deflection yoke as far forward as is possible.
6. Adjust the upper and lower pin symmetrically by opening or closing the Y-splitting axis correction magnets located on the neck assembly. [See Fig 3-3]
7. Return the deflection yoke to its original position and re-tighten its fixing screw.

Fig.3-1

Y-splitting axis correction magnet

Caution :

High voltages are present on the Deflection yoke terminals - take care when handling the Deflection yoke whilst carrying out adjustments.

(2) Landing

Note : Before carrying out the following adjustments adjust the magnets as indicated [See Fig.3-4].

1. Input a crosshatch signal from the signal generator.
2. Rough-adjust the focus and horizontal convergence.
3. Switch from the crosshatch pattern to an all-red pattern.
4. Move the deflection yoke backwards and adjust with the purity magnet so that the red is at the centre and it aligns symmetrically [See Fig.3-5].
5. Move the deflection yoke forward to the point where the entire screen just becomes red [Mark its position].
6. Move the deflection yoke further forward until the screen just changes colour at the edges. [Mark its position]
7. Position the deflection yoke between the two marks indicated above.
8. Input a crosshatch pattern from the pattern generator and rotate the deflection yoke so that the horizontal lines are parallel with the top and bottom of the screen.
9. When the position of the deflection yoke has been determined, fasten it with its fixing screw.
10. Switch the pattern generator to green then blue and confirm the purity.
11. If the beam does not land correctly in all the corners of the screen, use disk magnets to correct it. [Confirm the corner landing for green and blue]

Fig.3-2

Fig.3-3

Fig.3-4

3-2. Convergence

(1) Screen centre convergence [Static convergence]

1. Input a dot pattern signal from the pattern generator.
2. Normalize the picture setting.
3. [Moving vertically], adjust the V.STAT magnet so that the vertical red, green and blue dots coincide at the centre of the screen.

Fig.3-5

By opening or closing the V.STAT magnet, the red green and blue dots move in the direction indicated below.

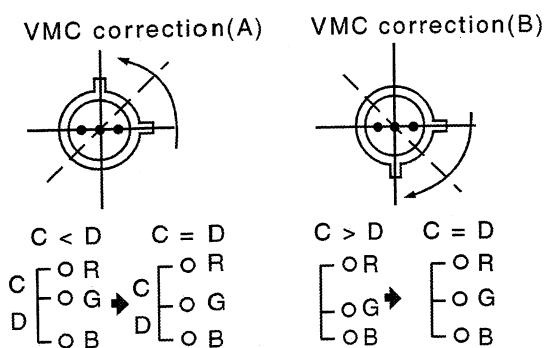

Note: Do not adjust the H.STAT by rotating the V.STAT magnets as this can affect the focus setting.

4. Correction for HMC [Horizontal mis-convergence] and VMC [Vertical mis-convergence] by using the BMC [Hexapole] magnet.

- a). HMC correction by BMC [Hexapole] magnet and movement of the electron beam.

- b). VMC correction by BMC [Hexapole] magnet and movement of the electron beam.

HAMP Adjustment

Adjust the HAMP using HAMPL and HAMPR registers in the Dynamic Convergence section of the service menu.

HTIL Adjustment

HTIL correction can be performed by adding a THL correction assembly to the Deflection yoke.

YCH Adjustment

TLV Adjustment

H-TRAP Adjustment

The H-TRAP should not be adjusted unless absolutely necessary as it affects the TLV settings.

Layout of each control

Note : If you are unable to adjust the corner convergence properly, this can be corrected with the use of permalloy magnets.

3-3. Focus Adjustment

1. Receive a television broadcast signal.
2. Normalize the picture setting.
3. Adjust the focus control located on the flyback transformer to obtain the best focus at the centre of the screen. Bring only the centre area of the screen into focus, the magenta-tinge appears on the screen. In this case, adjust the focus to optimize the screen uniformly.

3-4. Screen (G2), White Balance

[Adjustment in the service mode using the remote commander]

G2 adjustment

1. Input a dot signal from the pattern generator.
2. Set the Picture, Brightness and Colour to minimum.
3. Apply 165V DC from an external power supply to the R, G and B cathodes of the CRT.
4. Whilst watching the picture, adjust the G2 control [SCREEN] located on the flyback transformer to the point just before the flyback return lines disappear.

White balance adjustment for TV mode

1. Input an all-white signal from the pattern generator.
2. Set the TV set or operation in Service Mode. [See Page 21].
3. Select 'Service' from the on screen menu display and press 'Right Arrow'.
4. The 'Service' menu will appear on the screen.[See Page 22]
5. Set the 'Contrast' to MAX.
6. Set the 'R-Drive' to 50.
7. Adjust the 'G-Drive' and the 'B-Drive' so that the white balance becomes optimum.
8. Press the 'OK' button to write the data for each item.
9. Set the 'Contrast' to MIN.
10. Set the 'R-Cutoff' to 29.
11. Adjust the 'G-Cutoff', and the 'B-Cutoff' with the left and right buttons on the remote commander so that the white balance becomes optimum.
12. Press the 'OK' button to write the data for each item.

SECTION 4 CIRCUIT ADJUSTMENTS

4-1. Electrical Adjustments

Service adjustments to this model can be performed using the supplied remote Commander RM-944 (KV-29XL70) or RM-934 (KV-29XL71).

How to enter into the Service Mode

1. Turn on the main power switch and enter into the stand-by mode.
2. Press the following sequence of buttons on the Remote Commander.

'TT—' will appear in the upper right corner of the screen. Other status information will also be displayed.

3. Press 'MENU' on the remote commander to obtain the following menu on the screen.

```

Geometry
Service
Scanrate
DAC
Dyn. Conv.
PIP
Sound
IF adjust
Error Menu

AE6B v4.20 (Dic 03)
Factory data FFh FFh
MSP/Scan/IOB: MSP3411G/9402-13/ON
    
```

4. Move to the corresponding adjustment item using the up or down arrow buttons on the Remote Commander.
5. Press the right arrow button to enter into the required menu item.
6. Press the 'Menu' button on the Remote Commander to quit the Service Mode when all adjustments have been completed.

Note :

- After carrying out the service adjustments, to prevent the customer accessing the 'Service Menu' switch the TV set OFF and then ON.

WORKING TIME

HOURS	14
MINUTES	7

Sub Brightness Adjustment

1. Input a Monoscope pattern.
2. Set the TV set or operation in Service Mode.
[See Page 21].
3. Select 'Service' from the on screen menu display and press 'Right Arrow'.
4. The 'Service' menu will appear on the screen.
5. Adjust the 'Sub-Brightness' data so that there is barely a difference between the 0 IRE and 10 IRE signal levels.

Sub Contrast Adjustment

1. Input a video signal that contains a small 100% white area on a black background.
2. Connect an digital voltmeter to Pin 10 of J7375 [C Board].
3. Set the TV set or operation in Service Mode.
[See Page 21].
4. Select 'Service' from the on screen menu display and press 'Right Arrow'.
5. The 'Service' menu will appear on the screen.
6. Adjust the Sub-Contrast to obtain a voltage of 105 +/- 5V.

Sub Colour Adjustment

1. Receive a PAL colour bar signal.
2. Connect an oscilloscope to Pin 6 of CN7001 [A Board].
3. Set the TV set or operation in Service Mode.
[See Page 21].
4. Select 'Service' from the on screen menu display and press 'Right Arrow'.
5. The 'Service' menu will appear on the screen.
6. Adjust the 'Sub Colour' so that the Cyan, Magenta and Blue colour bars are of equal levels as indicated below.

Deflection System Adjustment

1. Set the TV set or operation in Service Mode.
[See Page 21].
2. Select 'Geometry' from the on screen menu display and press 'Right Arrow'.
3. The 'Geometry' menu will appear on the screen.[See Page 21]
4. Select and adjust each item in order to obtain the optimum image.

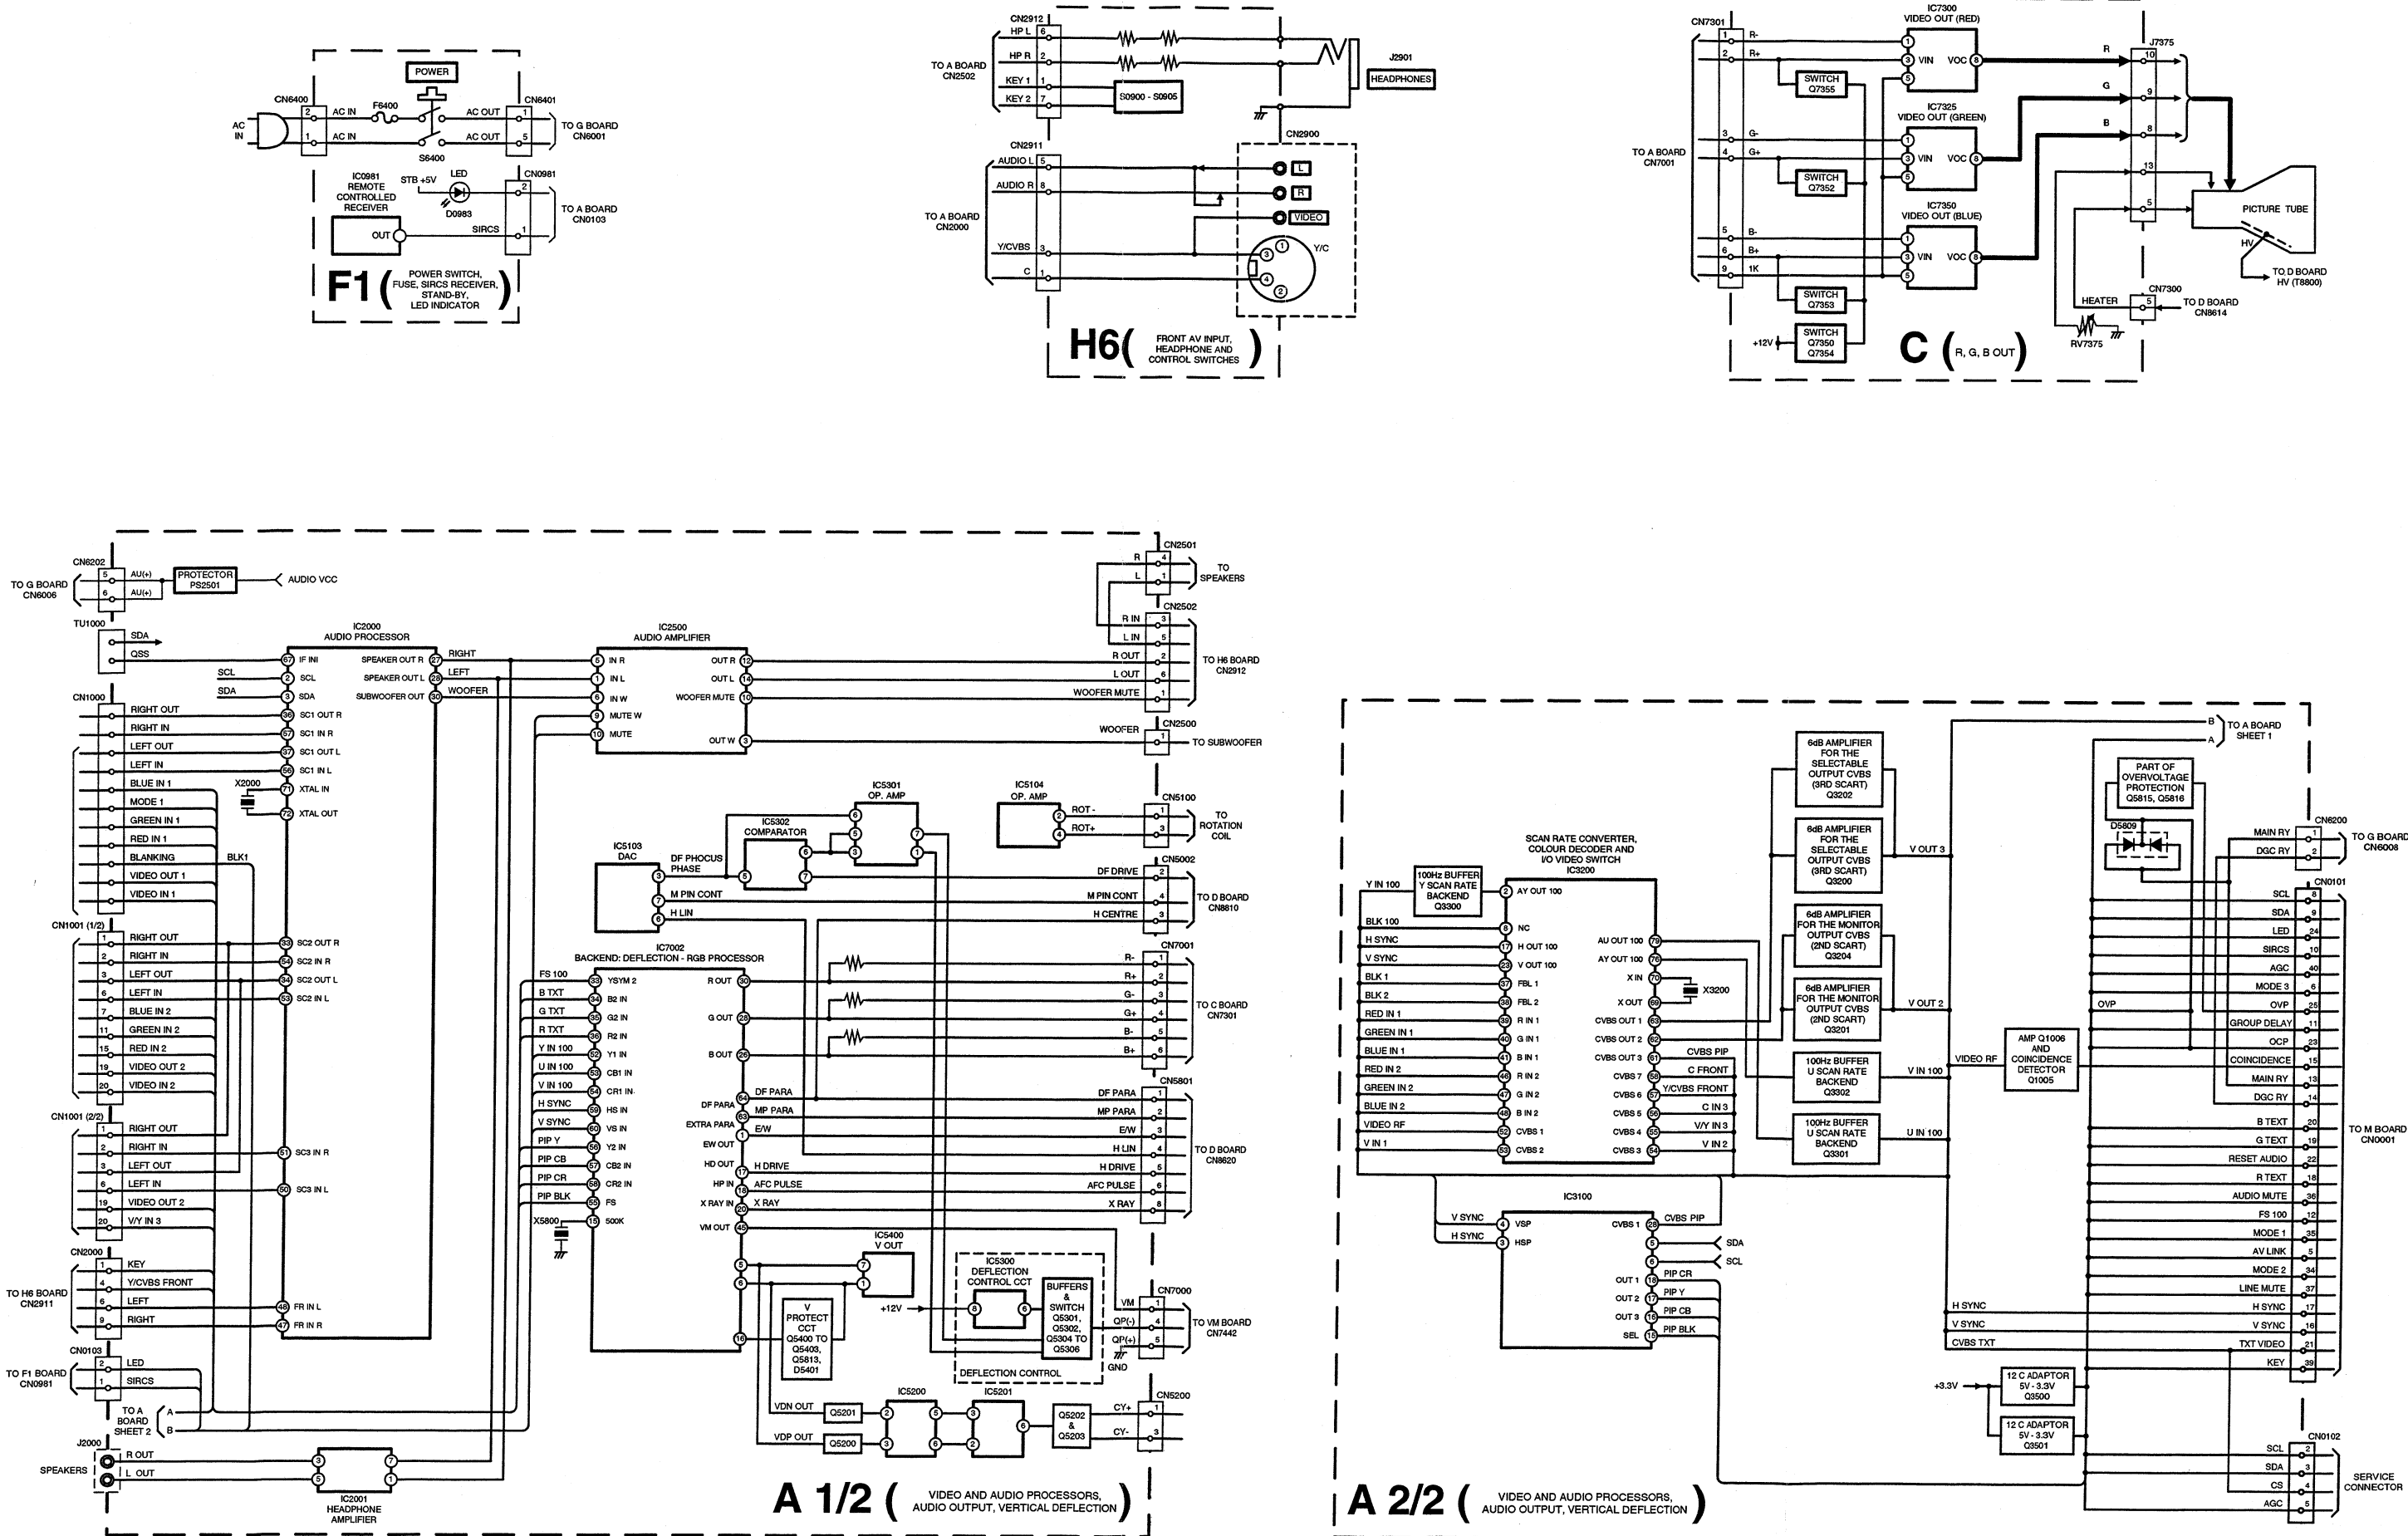

4-2. TEST MODE 2:

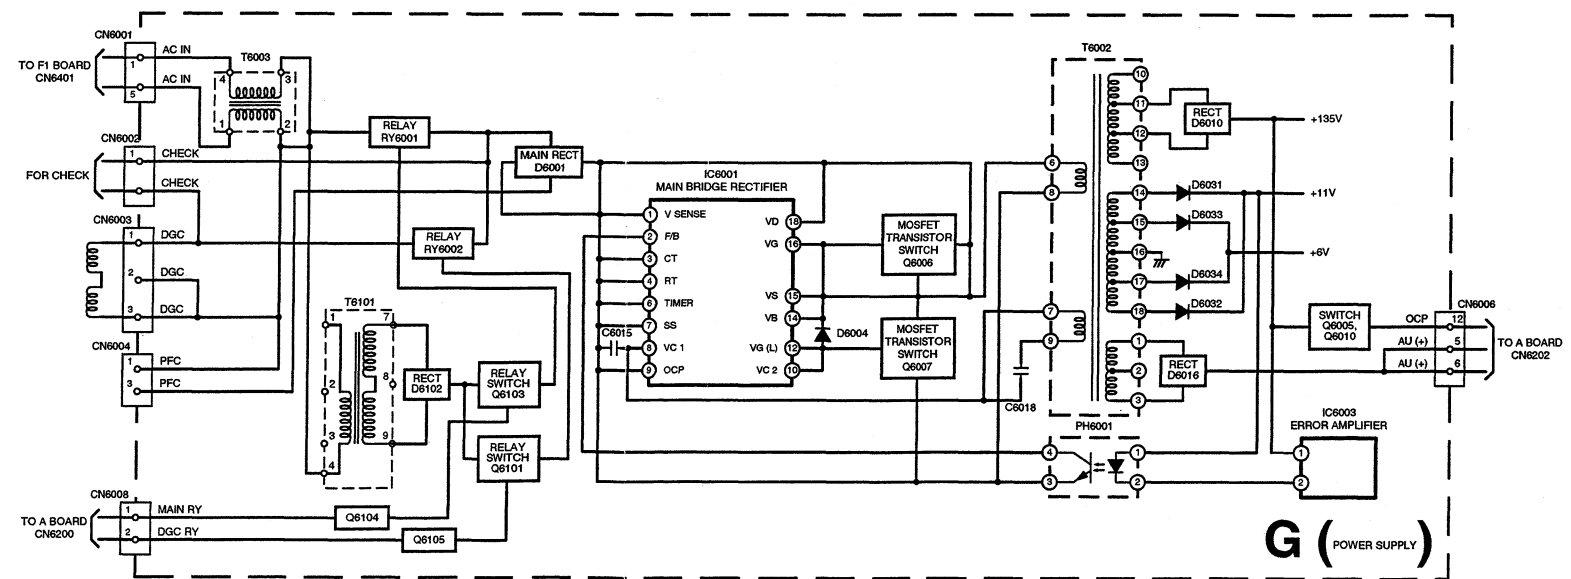

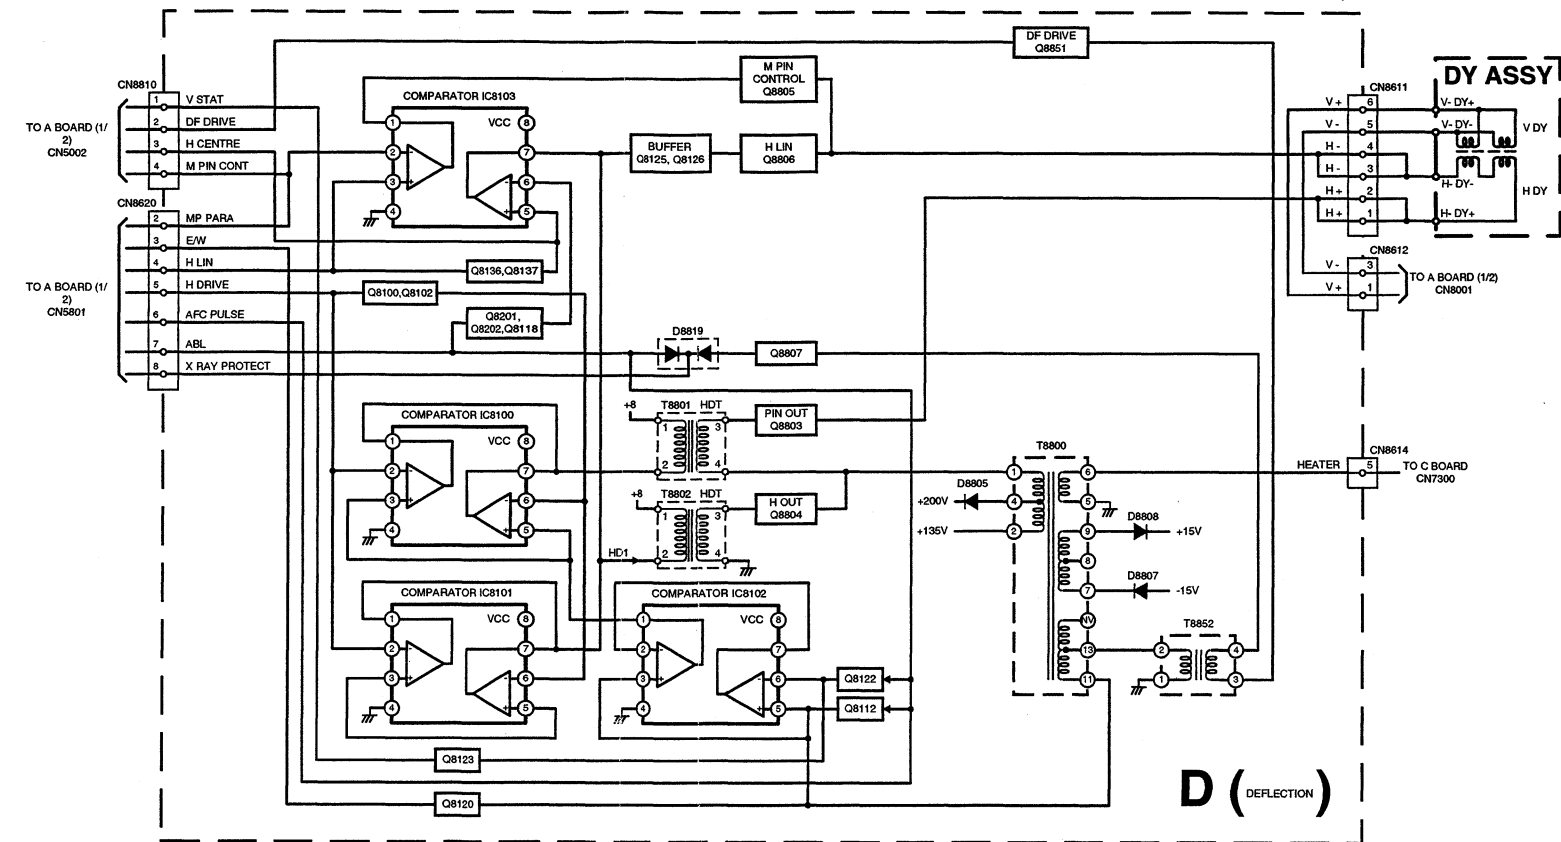

Test Mode 2 is available by setting the TV for operation in Service Mode [As shown on Page 21], OSD 'TT' appears. The functions described below are available by selecting the two numbers. To release the 'Test mode 2', press 00, 10, 20 ... twice or switch the TV set into Stand-by mode. In 'TT Menu' mode, it is possible to remove the Menu from the screen by pressing the Speaker Off button once. Pressing the Speaker OFF button a second time will cause the Menu to reappear. The function is kept even when the menu is not displayed on screen !!.

5-3. SCHEMATIC DIAGRAMS AND PRINTED WIRING BOARDS

- Note :**
- All capacitors are in μF unless otherwise noted.
 - pF : μF 50WV or less are not indicated except for electrolytic types.
 - Indication of resistance, which does not have one for rating electrical power, is as follows.

Pitch : 5mm
Electrical power rating : 1/4W

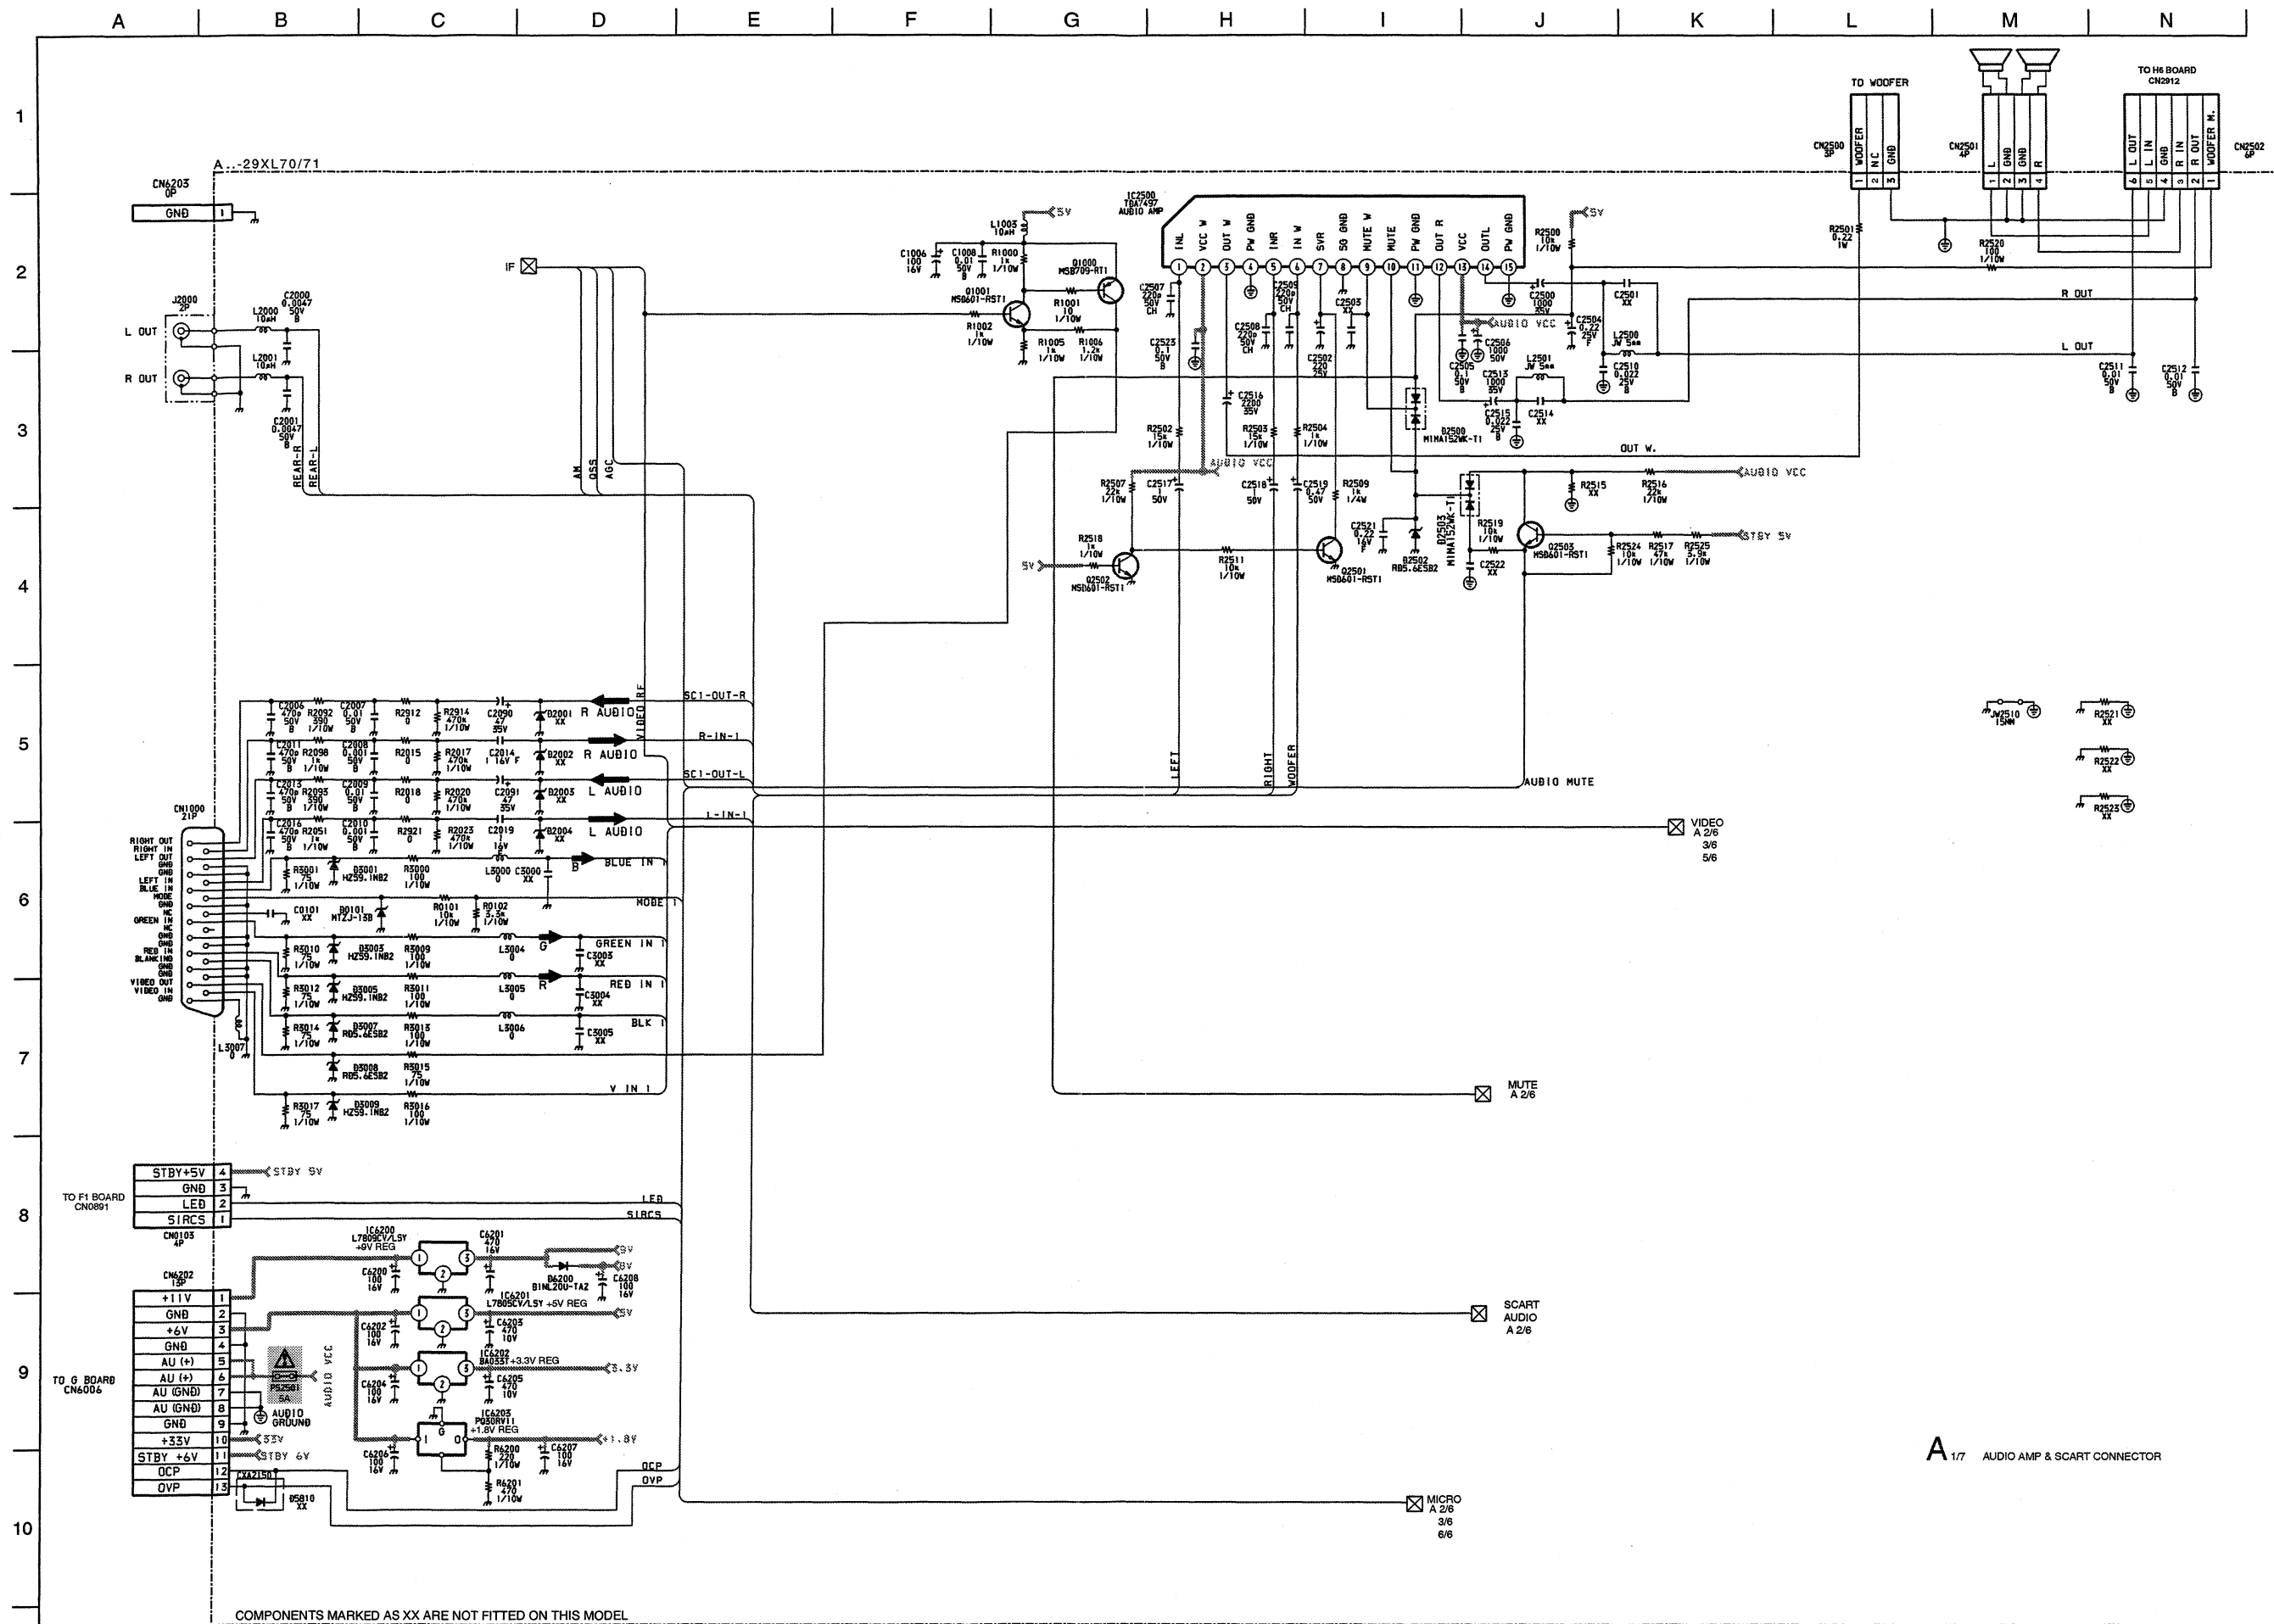

- Chip resistors are 1/10W
- All resistors are in ohms.
 $k = 1000 \text{ ohms}$, $M = 1000,000 \text{ ohms}$
- : nonflammable resistor.
- : fusible resistor.
- : internal component.
- : panel designation or adjustment for repair.
- : B + bus.
- : B - bus.
- : RF signal path.
- : earth - ground.
- : earth - chassis.

Reference Information

RESISTOR	RN	: METAL FILM
	RC	: SOLID
	FPRD	: NON FLAMMABLE CARBON
	FUSE	: NON FLAMMABLE FUSIBLE
	RS	: NON FLAMMABLE METAL OXIDE
	RB	: NON FLAMMABLE CEMENT
	RW	: NON FLAMMABLE WIREWOUND
		: ADJUSTMENT RESISTOR
COIL	LF-8L	: MICRO INDUCTOR
CAPACITOR	TA	: TANTALUM
	PS	: STYROL
	PP	: POLYPROPYLENE
	PT	: MYLAR
	MPS	: METALIZED POLYESTER
	MPP	: METALIZED POLYPROPYLENE
	ALB	: BIPOLAR
	ALT	: HIGH TEMPERATURE
	ALR	: HIGH RIPPLE

Note : The components identified by shading and marked  are critical for safety. Replace only with the part numbers specified in the parts list.

Note : Les composants identifiés par une trame et par une marque  sont d'une importance critique pour la sécurité. Ne les remplacer que par des pièces de numéro spécifié.

Note :
Portions of the circuit contained within the marked areas as shown have high voltages present. Use care to prevent electric shock during inspection or repair. An Isolation Transformer must be used during any Service work to avoid possible shock hazard due to live chassis. The chassis of this receiver is directly connected to the power line.

TRACE

A new TV Repair Assistance Tool that combines ease of use and powerful PC software tools to allow you to save valuable time during many TV repairs.

The TRACE interface connects to the PC's serial port. It provides connection to the TV's I²C bus and can be provided with an InfraRed transmitter (optional).

The interface is powered by a standard 9 V PP3 battery for portable use, and can also be powered by an external 9V/25mA DC power supply.

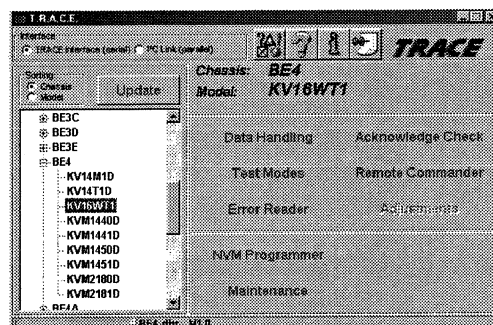

The TRACE software that is supplied with the interface allows you to:

- Read, restore and compare NVM contents via the I²C bus
- Acknowledge check of all I²C devices in the TV set
- Read Error Codes (emulation of the Error Reader tool)

With the optional IR Add-on kit, the following features can be added:

- Remote Commander emulation
- User programmable Functional Check through Infrared
- Fast and documented Test Mode setting of all Sony TV chassis

Additional features such as Adjustments and Troubleshooting are available in chassis-dependent software modules. Please contact your local Sony Service organisation for the latest information.

Note: For workshops already using the existing I²C Link parallel port interface (9-948-320-30), this software can be used as well, replacing the TV Data Handling software (9-948-340-50), but Error Reader and IR functions can only be accessed with the TRACE interface.

Partnumbers: TRACE Starter Kit (TRACE interface + software): 9-948-320-70
 TRACE Software (for users of the I²C Link interface): 9-948-340-80
 TRACE IR Add-on (IR interface + Remote Commander software): 9-948-320-80

PC requirements: IBM-compatible PC with operating system Windows95, Windows98, or WindowsNT*.

* WindowsNT only supported with TRACE interface
